This game may seem too simplistic. There is truth to that statement. However, the modern market the scope of games has ballooned to the point where many have become a multifaceted behemoth to the extent that your play style will only provide a fraction of the game's total experience. In contrast, AstroShift provides a welcome step backwards to a more straightforward structure. The entire game is provided upfront and there is a single way to play. 90 minutes of a moderate enjoyment is worth the cost.

. Really fun puzzle game. Excellent game.. It might say I have 5 hours on record, but I do not. I installed this game and upon booting it up, nothing happened. I tried to boot it up again and again, nothing happened. So I guess it's kinda broken for me. (This post was made as a joke and I am in no way of hating the game even though I haven't been able to boot it up.. A good game with good graphics but you need fine movement to be able to get through some of the puzzles, sadly I found this to difficult early on the game and could progress no further. A pity.. Sparkle 2 is a wonderful puzzle game, very similar to Zumas Revenge and the Luxor game's. This game has a magical feel to it, and a story to go as well. The music is pleasant to the ear, and the game is very addicting. If you like these type games you will enjoy this game for sure :)

Without too many spoilers, the store page describes the game very well, what you see and hear is what you get. This game is worth the asking price, in my personal opinion :)

I will play this game till the cows come home, inbetween other games, and at my own personal leisure.

I Love this game \u2665\u2665\u2665

Only 1 down fall, my achievement for getting all the stars in Survival did not activate and pop, must be a bug glitch :(

. the game is nice but there is a lack of players , most of the time there are zero matches available because there are no players. The only thing better is a T-800. A very good game! But you will need a decent computer to play it, if you are not a fan of this kind of thing you will get bored fast, also the controls take a long time to get used to but currently it's on sale so right now it is 100% worth it.

tbh I still like Zebruh after this route but it doesn't change the fact that I'd gladly kick him across a football field lmao. (not native speaker here)

While not being a AAA game, it's at least a AA game : the graphics are still clean for today (2019), the feeling of the gameplay is flawless while not revolutionizing anything, the campagne is really enjoyable with cool cinematics while not being top notch. The multiplayer is really cool while being almost dead to this date (don't take DLC's, there is nobody to play them, but classic maps are still played and the Horde mode is fun as \u2665\u2665\u2665\u2665). Seriously, it's a shame that Dawn Of War 3 failed that hard and Relic said they will focus from now on on Ages Of Empire 4 (still a good news tho) but we need a Space Marine 2 ! There are a lot of good Games Workshop video games, but they are for the vast majority little productions with meh to bad quality... Space Marine is for me the only game with DoW 1 close to a triple A in the GW universe. go for it, it cost nothing today and is enjoyable for what it is !. Want often of the dynamics and feelings?

Then faster in the Shoe game, the program together!. The music we love from the game we love. Brilliantly!. Includes one of the best armour suits in the game when you complete it and you also get to shoot communists.

What's not to love about it?. To be competitive you need to dump massive amounts of money into this game and it also requires you spend multiple hours per day to stay competitive as well. It is a major time sync that is completely made for those that started when the servers opened not really friendly for new users.. Pretty good Zelda style game. It's 101% old school and you'll be searching every inch of the map for items with minimal hints, which is good. However combat mechanics and the actual puzzles and dungeons are a bit so-so. If they can improve on those aspects the sequel could be amazing
