As I understood you ask: Is there any reason for using 64 bit OS if one would be using 32 bit? The answer to this question is, although maybe not the whole truth, that the key point of using 64 bit OS is to be able to address 64-bit memory (RAM). It's easy to calculate memory usage on a 32-bit PC and comparing those to a 64-bit PC, the memory used by a single application can be
